An Election Issue

Those who believe—and hope—that corruption and graft in government will be a major issue in forthcoming elections on both the local and national level have found much encouragement in what happened in New York and Philadelphia on November 7.

In New York, the issue was absolutely clear-cut. The "reform" candidate for the presidency of the city council—second highest office in the metropolis—was Rudolph Halley, who made his name as counsel for the Kefauver crime committee. Mr. Halley is a Democrat, but the regular organization wanted no part of him. So he ran as candidate on the liberal, fusion and independent tickets. His main campaign issue was municipal corruption. Mr. Halley won handily, by a plurality—over three other candidates—of better than 160,000.

In Philadelphia, the Republicans have been in political control of the city for almost 70 years. Recent developments indicated, to put the case mildly, that certain municipal affairs smelled to high heaven. The Democratic candidate, for mayor, Joseph Clark, ran on a platform very similar to Mr. Halley's. He promised to clean things up. He too won decisively.

It is always a mistake to attach too much significance to off-year elections—experience has proven that they often mean nothing as a harbinger of things to come. However, such very pronounced switches in public sentiment as these hardly look like just a passing breeze. In a great many circles, and in both the parties, there is a feeling of certainty that the clean government issue will be dominant in 1952.

"I myself am not much concerned with the lack of freedom abroad as with the fact that every day's newspapers and radio broadcasts bring us the sorrowful news that we have less freedom here at home than we had twenty-four hours before. Controls, taxes, and past and future foreign wars, are making us the pawns of a bureaucratic, militaristic state." — Bruce Barton.

Dawson's

PICK a road that you know by heart. Not too good a road. One that has some bumps—some unbanked turns—a tough hill or two.

Then get in touch with us, and let us put you behind the wheel of a Buick, with Dynaflo Drive.*

Now you're all set for a new experience. You'll find out this:

Those bumps seem to lose their bobble. You just take them with a smooth and level stride.

Those unbanked turns don't seem so sharp, and those hills seem almost to flatten out.

How come? Well, a lot of things are different when you travel in a Buick.

You're riding on big, soft coil springs that let every wheel dance beneath you, without passing on the jolts to you in the car.

You're driving a car that's plenty inches broader than it is high—a sure-footed road-hugger if there ever was one.

And you're riding behind a Fireball Engine—Buick's time-tested version of a high-compression valve-in-head—an engine that packs more power than most people ever need to use.

With this power—and Dynaflo Drive*—you don't have to "rush" a hill at the bottom to soar serenely over the top. You just feed the power as you need it—climb with a

sure, steady swoop without buck or bobble all the way up.

There's a lot more that we could tell you about a Buick. But such things as room, and comfort, the confident way it steers, and the way it shortens the miles are things you can best discover from personal experience.

So why not follow the routine already suggested? You supply the road—we'll supply the car—and let it speak for itself.

*Equipment, accessories, price and model are subject to change without notice. †Standard on Roadmaster, optional on other Buicks.

Detroit's long-sought expressway is fairly well set now. An \$80,000,000 bond has been approved.

How Michigan's United States senators voted for economy and spending in the 1951 session continues.

gress, as tabulated by the Council of State Chambers of Commerce: Homer Ferguson, 17 for economy; Blair Moody, 6 for economy; 9 for spending.

A shortage of labor is delaying construction of ore carriers for the Great Lakes. Nearly a dozen carriers are scheduled to be launched in 1952. Any delay will affect defense mobilization and Michigan's civilian economy.

Some 2,000 state civil service

employees will receive pay boosts totaling more than \$5,000,000 in December. When the increases would be effective has not been determined.

Michigan's civil defense system got a work-out recently. A Canadian twin-engine airplane, lost in a snowstorm, wandered into Michigan. CD officials said "hundreds of ground observers reported the flight of the unidentified plane to the air raid filter center at Grand Rapids."

The state will need 12,000 more classrooms for 357,000 additional school children in the next five years, says J. F. Thaden, of the M. S. C. department of sociology and anthropology. He bases his figures on birth rate statistics.

U. of M.'s \$35,000,000 postwar expansion program is some two-thirds completed. Fourteen new buildings or building additions are now in use. Construction is underway on four other projects and three structures are in the planning stage.

Latest reports indicate there are 135,000 unemployed in Michigan, compared with 56,000 a year ago. Williams' full employment committee laid the blame on delay in obtaining new plants and machine tools to perform defense contracts already issued.

Public service commission made its first outright denial of a Bell Telephone rate increase in the state's history. The company wanted a \$22,500,000 rate jump. President John Greene said his company would continue its effort to get money "we need for sound operation." Says the governor: "... sound thinking."

Since police handle more breaking and entering cases than any other major crime, State Police will conduct a series of special schools in fingerprinting, identification and burglary investigation during the next two months. Classes will be held in various communities all over the state.

Before Christmas arrives more than 1,000,000 Yule trees and many tons of evergreen boughs will be brought in from Michigan forests.

High-test Blue Sunoco Primed with Butane

...gives quicker quick starts All Fall and Winter!

CHART SHOWS that, as seasonal temperatures drop, Butane is added to High-test Blue Sunoco to step up its cold weather volatility. As a result, Butane-Primed Blue Sunoco fires instantly in coldest weather... gives you quicker quick starts All Fall and Winter.

Radio News: "Sunoco ThreeStar Extra—Your Newspaper of the Air." 6:45 p. m., Monday through Friday over 1 BC Stations.

PRIMED WITH BUTANE means that the Blue Sunoco gasoline NOW at your Sunoco Dealer's is specifically designed to give faster vaporization in cold weather. That means High-test Blue Sunoco fires instantly... needs less choking... warms up faster to full power! That, in turn,

means you get greater gasoline economy... top engine performance all Fall and Winter!

Discover what Butane-Primed cold weather starting is really like, fill up with Blue Sunoco... the high-test gasoline that sells at regular gas price! Now at your Sunoco Dealer's!

Compared to Premium-Priced Gasolines, High-test Blue Sunoco also gives you

2¢ SAVING PER GALLON

MORE MILES PER DOLLAR

High-test Blue Sunoco sells at regular gas price, which is usually 2 cents a gallon below premium-priced gasolines. In spite of its low price, Blue Sunoco gives you more value because of its outstanding balance of such qualities as anti-rust, quick-starting, anti-stalling, clean-burning, long mileage and high-test action.

Automotive Engineers know that the weight of a gallon of gasoline determines energy content... mileage. Official surveys show that the weight per gallon of High-test Blue Sunoco matches the average of all leading premium-priced gasolines. In short, High-test Blue Sunoco gives you equal energy, equal mileage at lower cost... gives you more miles per dollar.

High-test... Still at Regular Gas Price!

Fluorescent Dyed And Printed Fabrics

Those dazzling colors you see in shirts, sweaters jackets caps, socks and ties are probably fluorescent colors. This class of dyes was developed during World War II. For better visibility, landing signal officers of U. S. carriers wore fluorescent striped uniforms and signaled planes to landings with fluorescent paddles. Since the war, this type of dye has found wide usage for dyeing and printing of fabrics for wearing apparel, accessories and household fabrics.

Fluorescent dye differs from other classes of dyes used in coloring yarns and fabrics. It is made of translucent substances that fluoresce or glow when the invisible ultra-violet light of daylight hits or contacts it. These dyes are usually very vivid in hues of fire red, saturated green, neon red and yellow, signal green, flag red, and flag blue. They are used on fabrics of various fibre content—acetate, nylon, and wool. Just recently it was announced that a new mercerized cotton yarn has been developed that can be dyed with fluorescent dye.

Textile manufacturers have found that this type of dyestuff can also be used to make screen and roller printed fabrics. There is a fluorescent printed fabric called "Colorvision Print." These colors are not as vivid as the dyed fabrics.

The National Institute of Cleaning and Dyeing has found that fabrics dyed or printed with fluorescent dyes can bleed and change color under certain conditions of wear and cleaning. They are very sensitive to light. Upon long exposure to sunlight, some of the dyes become lighter, others darker in color. They are very sensitive to alkalis. Staining substances that are alkaline in nature—alkaline perspiration, alkaline soaps and detergents—can cause a color change in this class of dyestuffs.

DIAL 3877 — WILL PICKUP & DELIVER

From where I sit ... by Joe Marsh

"Fair and Square"

We've just had a political campaign with everything from a torchlight parade to a neck-and-neck ballot box race.

Rusty Robinson, with no campaign funds, planned his Election Eve speech for the Square. Slim McCormick, who owns the Palace movie house, was finishing up his campaign in Pioneer Hall.

Then it began to rain. Rusty's political career was fizzling out in the damp when Slim showed up to say that Robinson people could meet in his theatre—for nothing. "I want to beat Rusty," Slim said,

"but certainly not with rain!"

From where I sit, you've got to give Slim credit for acting on his belief that everyone has a right to be heard—just as everyone has a right to his own opinions and tastes. Maybe you like hot coffee, for instance, when you "take a break." Well, my vote goes for a refreshing glass of beer. After all, we're lucky to be living in a free country where we can have our own preferences!
